PROJECTS

Data Search USA, *Sole Developer*   July 18
github.com/kuehlein/data-search-usa
A tool for creating custom queries to datausa.io and presenting their data.
• Search for dynamically received tables, filter the table, choose, order and filter columns.
• The data is presented in an infinite-scroll, lazy-loaded table with the ability to "scroll to n index".
• Used React-Redux, React-Virutalized, Express.js, DataUSA's API

Code Mode, *Team of 4 developers*   Dec 17
github.com/TheUniverseofCoding/world-of-code
Chrome extension to provide a coding platform to facilitate tech education
• In a dynamic skin over the UI, a repl is rendered along with questions
• Used React-Redux, PostgreSQL, Sequelize, Express.js, Chai
• Agile methodology, regular stand-ups, waffle.io utilized
• Managed the various states of the application, the permissions, and orchestrated the coalescence of the application.
• Heavily utilized dynamic programming through use of the React components and the Redux store.

Ethical App-Store, *Team of 5 developers*   Nov 17
github.com/bind-this/ethical-app-store
An e-commerce store for apps
• Used React-Redux, Semantic UI, PostgreSQL, Sequelize, Express.js, Chai
• Agile methodology, regular stand-ups
• Built out functionality for reviews, including permissions and UI
• Created entire view for individual product display
